

Assignment-6

1. Extract all odd numbers from a given list using list comprehension.
 - numbers = [1, 2, 3, 4, 5, 6, 7]
2. Extract vowels from a string using list comprehension. (Input: "education")
3. Generate all possible pairs from two strings using list comprehension.
 - Input: "ab" and "cd"
4. Get the first letter of each word in a sentence.
 - Input: "Python is very powerful"
5. Extract only the keys from a dictionary using list comprehension.
6. Count the number of spaces in a string.
7. List all consonants in the string **"Yellow Yaks like yelling and yawning and yesterday they yodeled while eating yuky yams"**.
8. Write a program to find out the frequency of each number in stored in a list using a python dictionary.
 - Example:
 - List1 = [1,2,3,4,5,6,7,8,9,7,6,2,4,2,5,23,6,4]
 - Output = {1: 1, 2: 3, 3: 1, 4: 3, 5: 2, 6: 3, 7: 2, 8: 1, 9: 1, 23: 1}
9. Write a function translate() that will translate a text into "rövarspråket" (Swedish for "robber's language"). That is, double every consonant and place an occurrence of "o" in between. For example, translate("this is fun") should return the string "tothohisos isos fofunon".
 - **Rule:** Double every consonant, place "o" in between.
