Nagios - Linux Monitoring

Setup a nagios server and monitor the following private services of two remote linux host:

- Agent Version
- CPU Average
 - Generate a Warning alert when the cpu usage is 70% or above.
 - Generate a Critical alert when the cpu usage is 80% or above.
- Virtual Memory
 - Generate a Warning alert when the disk usage is 70% or above.
 - Generate a Critical alert when the disk usage is 90% or above.
- Processes
 - Generate a Warning alert when the process count is above 50.
 - Generate a Critical alert when the process count is above 80.
- Uptime
- Server Name
- Logical Disk Usage
 - Generate a Warning alert when the logical disk usage is 70% or above.
 - Generate a Critical alert when the logical disk usage is 90% or above.
- Network Interface

deb_10-1	Agent Version	OK	08-27-2020 15:35:28	0d 5h 14m 39s	1/3	OK: Agent_version was [2.1.9]
	Hostname	OK	08-27-2020 15:35:03	0d 0h 9m 1s+	1/3	OK: Node was [deb2]
	Logical Disk Usage	OK	08-27-2020 15:36:08	0d 0h 9m 1s+	1/3	OK: Used disk space was 2.30 % (Used: 809.88 MB, Free: 34359.37 MB, Total: 37083.42 MB)
	Network Interface	OK	08-27-2020 15:37:12	0d 0h 9m 1s+	1/3	OK: Bytes_sent was 0.03 MB (Dropin: 0 packets, Bytes_rcv: 0.04 MB, Packets_rcv: 464 packets, Dropout: 0 packets, Errout: 0 errors, Errin: 0 errors, Packets_sent: 175 packets)
	Process Count	OK	08-27-2020 15:38:17	0d 0h 9m 1s+	1/3	OK: Process count was 100
	Uptime	OK	08-27-2020 15:39:22	0d 0h 9m 1s+	1/3	OK: Uptime was 48 minutes 21 seconds
	Virtual Memory	OK	08-27-2020 15:40:26	0d 0h 9m 1s+	1/3	OK: Used memory was 12.80 % (Available: 1.82 GB, Total: 2.09 GB, Free: 1.85 GB, Used: 0.14 GB)
